Title : Brief Review of the Results of Forty Years Work in Forest Soil Science.

Orig Pub : Pochvovedeniye, 1957, No 10, 16-32

Abstract : The author begins a literary survey of the question with an evaluation of the works of V.V. Dokuchayev, G.N. Vysotskiy, A.A. Izmail'skiy and G.P. Morozov in the development of forest soil science. After the October Revolution, the study of the forest-plant properties of soils was developed on a large scale and acquired a systematic nature. The chief problems were: (1) forest cultivation in the steppe zone for the purpose of drought control; (2) reforestation and raising forest productivity in the forest-steppe and forest zones. Forest soil research during the past

Title : Interaction and Reciprocal Effect of Forest Vegetation
with Soils.

Orig Pub: Pochvovedenie, 1956, No. 7, 80-91

Abstract: Report on All-Union conference of soil scientists
January 28 to February 4, 1956. Under different
climatic conditions there is noted substantial differences
in consumption from and return to the soil of mineral
and organic substances by the same woody species; in
the varied composition and activity of microorganisms
in processes of decomposition and synthesis of organic
substances, which is reflected in the composition of
humus combinations, and in the final account, on
soil formation. The development of soils is determined
in greatest degree by constantly changing effects of

PHASE I BOOK EXPLOITATION

POL/2588

Zonn, Włodzimerz

Ewolucja gwiazd (The Evolution of Stars) Warszawa, PWN, 1958. 270 p.
(Series: Biblioteka problemów) Errata slip inserted. 5,200 copies.
printed. Ed.: B. Wróblewska.

PURPOSE: The book is intended for students of astronomy and the physical sciences. It will be of interest to the amateur astronomer.

COVERAGE: The author outlines various theories on the origin and evolution of celestial bodies, and discusses the problem of interstellar matter. Star associations, star chains, and dark nebulae are also discussed. The author thanks Professor St. Piotrowski, Doctor Rudnicki, Mgr. [Magister] K. Serkowski, and Mgr. A. Kruszewski. No references are given.

Card 1/3

POL/2588

The Evolution of Stars

TABLE OF CONTENTS:

I. Introduction	9
II. Basic Problems in the Motion of Celestial Bodies	12
III. Observation Data	35
IV. The Hertzsprung - Russell Diagram	65
V. Different Origin of Stars (According to W. Baade and B. Kukarkin)	82
VI. The Youngest Stars - Members of Associations	116
VII. Interstellar Matter	138
VIII. Chains of Stars and Dark Nebulae	159
